COMPANY OVERVIEW

Yonda Solutions is a New York small disadvantaged business (est. 2023) that designs and builds custom applications, data systems and AI-assisted workflow automation. We replace spreadsheets, paper forms and disconnected databases with secure, easy-to-use web and mobile tools, delivered at a fixed price with senior, founder-led delivery.

CORE COMPETENCIES

- **Custom application development:** web, iOS and Android (Flutter, React/TypeScript, Capacitor), with role-based access and notifications
- **Training, qualification & records systems:** course scheduling, certifications, expirations, transcripts, LMS integration
- **Data & analytics:** database design (SQL, Oracle APEX, Access/VBA), Power BI dashboards, readiness and performance metrics
- **AI integration:** chatbots and virtual assistants, document and data-entry automation, AI-assisted search
- **Legacy modernization & data migration:** profiling, cleansing, de-duplication and phased cutover
- **Cloud & integration:** Google Cloud/Firebase, secure APIs, third-party integrations

DIFFERENTIATORS

- 10+ years building data and records systems for large healthcare and other regulated, records-intensive organizations; apps in production for 3+ years
- Founder-led delivery: the person you meet is the person who builds
- Production apps live on the App Store and Google Play
- Firm-fixed-price, remote-friendly delivery; well suited as a specialist subcontractor
